

Sullivan's Cove Cask Strength

60%

There are now more distilleries on the Australian island of Tasmania than there are in Ireland, Japan, or

Canada, and the island is demanding to be taken seriously as a whisky territory. At the forefront of the Aussie invasion is

Sullivan's Cove, once home to some decidedly ordinary whiskies, but now kicking into gear. This needs water, but is a unique mix of fruit, nuts, and soft malt. Clean, more-ish, and unique, this is Australia raising its flag.
