

Amrut 100 (U.S. release)

57.1%

The whisky gets its name from the fact that 57.1% ABV is 100 proof in the British measuring system: the alcohol concentration needed to sustain flaming gunpowder. It comes in 100 cl bottles and only 100 bottles are being released in each territory. This malt takes no prisoners, with big, bold flavors dominated by peat, but with chutney-style fruit and an array of spice making for a rich, intense taste experience.
